Powder Coated Motor-Driven Sheet Racking For Customized Multi-Level Plate Rolling-out

Our Product Introduction

Basic Information

Product Specification

- Model NO.: QF-Sheet Racking
- Material: Steel
- Structure: Drawer
- Type: Multi-Level Racking
- Mobility: Combined
- Height: 0-5m
- Weight: Customized
- Closed: Semi-closed
- Development: New Type
- Serviceability: For Special Purpose
- Color: Customized
- Lead Time: 20 Days
- Surface Treatment: Powder Coating
- Feature: Anti-Wear/Anti-Rust
- Transport Package: Standard Export Packing

Product Description

Product Description

A roll-out sheet rack is a type of storage system that allows for easy access and organization of large, flat sheets like metal, wood, or plastic.There are two types of sheet rack according to the drive method: Hand Operated & Motor drive.

Hand Operated Roll-out Sheet Rack

Motor Drive Roll-Out Sheet Rack

Brand Name	Qifei
Product name	Warehouse Heavy Duty Hand Cranked Metal Sheet Racking
Length	Customized
Width	Customized
Height	Customized
Capacity	hundreds to thousands kg/layer
Material	Q235B
OEM&ODM	Available
Surface Treatment	Galvanized/Powder Coating
Color	Customized
Sample	Available
General Use	Warehouse Shelving/Rack, manufacturing or construction environments etc.
HS CODE	730890
Packaging Details	Plastic banding+Stretch film wrapped

The key features and parameters of a roll-out sheet rack include:

Rack Construction:

Frame material: Often made of steel, aluminum for strength and durability.
Roller system: Smooth-rolling casters or bearings that allow the racks to extend out.
Shelving: Adjustable, reinforced shelves to hold the sheet materials.
Capacity: The maximum weight the rack can safely support, typically ranging from hundreds to thousands of pounds.

Roll-Out Mechanism:

Extension length: How far the rack can roll out from the stationary frame.
Locking system: To secure the rack in the extended or retracted positions.
Ergonomics: The ease of operating the roll-out mechanism.

Sheet Retention:

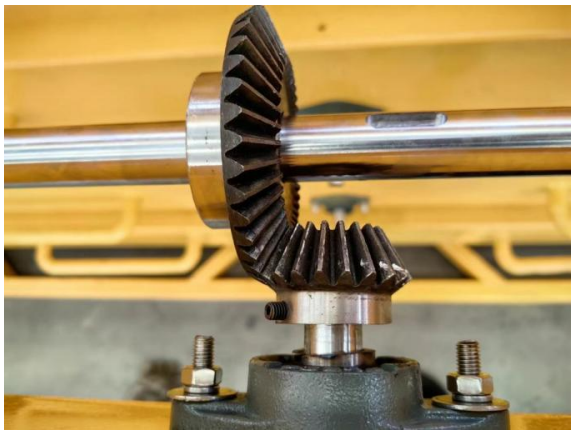
Retaining lips or guides: To prevent sheets from sliding off the shelves.
Adjustable stops: To customize the shelf depth for different sheet sizes.
Anti-tilt features: To improve stability and safety when extended.

Dimensions:

Rack size: Width, depth, and height to accommodate the desired sheet sizes.
Shelf spacing: Vertically adjustable to fit different sheet thicknesses.

Safety and Compliance:

Load ratings: Ensuring the rack can safely support the intended weights.
Stability: Preventing tipping or collapse when extended or loaded.
Regulatory standards: Meeting any industry or workplace safety requirements.



The specific parameters will depend on **the application, sheet materials, volume, and workflow needs**. Proper selection and installation of a roll-out sheet rack can greatly improve organization, accessibility, and efficiency in sheet material storage and handling.
